

SERVICES

Classic Full Set (1:1)

Between 1hour & 1hr 30mins

This is the most common set which is done. To each natural eyelash, one quality lash extension is applied. This set will give you a perfect natural and subtle look and the outcome will vary depending on the fullness of you own eyelashes.

Extra Full Set

Between 1hr 30mins & 2hours

This set will give you a lush fullness which will be more than a 'classic' but less than an 'extreme'! This application is done by mixing specific lengths, thicknesses and also adding two eyelashes onto one of your natural lash.

2D/3D Volume Set

Between 2hours & 3hours

This method involves several techniques. Multiple thin lashes (2-3) are placed carefully onto a single natural lash and is individually isolated. This set can be achieved natural and glam by changing the length and will give you a fluffier look.

Infills/Refills

Up to 50mins or more (Depending on which service)

Everyone has a different natural lash growth cycle and as your lashes grow, old ones will fall out and a new one will replace it! This process is done to maintain your eyelash extensions and look stunning for longer. Infills are 2-3weeks after your initial full set appointment and you must have at least 50% of lash extensions remaining to achieve a new fresh full set again.

Removal

Up to 30mins

The Removal process is done if you'd like to give a small break. It is quite simple and completely pain free. High quality removal liquids are used to break down the eyelash glue completely without any damage to your natural lash.

Frequently Asked Questions

QUESTION: What does the Eyelash Extensions process involve? What happens on arrival?

ANSWER: You will have a short chat with your technician about any inquiries, then you will lie flat on your back comfortably on a massage chair. After cleansing, applying your Vitamin & Aloe Vera based under eye pads, your process will begin. Your eyes will be shut throughout the application. It is completely pain free, relaxing and majority tend to have a nap!

QUESTION: How long does Eyelash Extensions last for?

ANSWER: Each individual has a different natural lash growth cycle and this plays a huge part in the way you shed. Lash extensions typically will last 4-6 weeks with a top-up/infill. The healthier your natural lashes are the better your eyelash extensions will hold and are more likely to last!

QUESTION: Do Extensions ruin your natural eyelashes?

ANSWER: When Eyelash extensions are carefully applied or removed by a fully qualified technician, they will NOT harm your natural eyelashes. Please note that it is important to at least give a 2-3 week break to extensions and allow your natural lashes to breathe in order to not damage them and make sure they remain healthy and strong!

QUESTION: How do I look after the lashes? What is the aftercare like?

ANSWER: You will have to keep your eyelashes dry for 48 hours before getting them wet. You will be given a little eyelash comb which you will have to brush your lashes out every morning and after you get your eyelashes wet. No oil based makeup or removers, no mascara, no fiddling or picking is allowed. This will harm your eyelashes completely!

Specialising in Semi-permanent eyelash extensions only,
D LASHES will bring an eye for detail which means every application will be unique and maximize your natural beauty for any occasion. The lash length, curl, thickness and fullness is applied specifically to reinforce your eye shape and give you a more 'natural' or 'glam' look!
